INTERNSHIP EXPERIENCE

Thinking Machines,Ujjain (April 2020 – June 2020)
Implementation of WebSocket Server as Central Server.Design and Implementaion of Home Controller APK.Design and implementation of Simulation process of HomeAutomation in Desktop Application.

LANGUAGES

- C, C++
- Java
- Python
- JavaScript

SPECIAL SKILLS

- Data Structures and Algorithms
- Competitive Programming
- J2EE/AJAX
- MySQL
- React JS

EDUCATION

Bachelor Of Engineering
Government Engineering College,Ujjain
2016 - 2020
Grades – 7.09 CGPA

Secondary School Certificate Examination
Unique Higher Secondary School,Manpur
Year of passing – 2013
Percentage – 84.2% (MP Board)

Higher Secondary Certificate Examination
Unique Higher Secondary School,Manpur
Year of passing - 2015
Percentage – 82.4% (MP Board)

PROJECTS

Smart Home Framework over Wi-Fi Network
It uses android app to control home equipments under Wifi Range,with the help of android device one can change appliances status by sending JSON Data(JSON of appliance) over the network(central server).
Video Demo : https://saksham2105.github.io/portfolio/
Github : https://github.com/saksham2105/smarthome

Database Designing Tool
It is a web based graphical tool that enhances productivity and simplifies data model and data modelling tasks It serves three purposes 1.For Designing database tables and relationship diagrams,2.SQL Script generation and 3.Plain Old Java Objects(POJO) Generation
Video Demo : https://saksham2105.github.io/portfolio/
Github: https://github.com/saksham2105/database-designing-tool

Binary Tree Visualization Tool
It is a Binary Search Visualization Application in which user can perform various operations like adding a node,deleting a node,searching,tree balancing,traversal techniques like inorder,preorder and postorder.
Demo: https://saksham2105.github.io/Binary-Search-Tree/index.html
Github: https://github.com/saksham2105/Binary-Search-Tree

PostMan Clone
It is a Replica of RESTClient tool in which user can send GET and POST Requests and pass request JSON or custom parameters for POST requests and will collect output of input url in a highlighted textarea,one can use this tool for debugging and testing purposes.
Demo : https://saksham2105.github.io/postman/
Github: https://github.com/saksham2105/postman
