SMARTHOME FRAMEWORK OVER WIFI NETWORK

Aim of this project was to create a loosely coupled server(WEB Socket Server),which can be accessed using various cross platform clients,an Android App to control home appliances under WIFI range using this server.Normally it is lazy job to upload code in IOT device again and again so for this purpose a simulation process has developed to analyze the entire automation.
Github : github.com/saksham2105/smarthome

MOVIE RECOMMENDATION SYSTEM

It is a Content Based Movie Recommendation System using Cosine Similarity Algorithm based on Vectors.A user will get list of movie's Top Cast and recommended movies based on their search result.
Demo : moviercmdsystem.herokuapp.com

POSTMAN CLONE

It is a Replica of RESTClient(micro service API) tool in which user can send GET and POST Requests depending on JSON request or custom parameters
Demo : saksham2105.github.io/postmaster/

EDUCATION

BACHELOR OF ENGINEERING

GOVT. ENGINEERING COLLEGE,UJJAIN
2016-2020
GRADES:7.09 CGPA

10th
Unique Higher Secondary School,Manpur
Percentage:84%
JUNE 2012-MARCH 2013

12th
Unique Higher Secondary School,Manpur
Percentage:82%
JUNE 2014-MARCH 2015
